Stearns Road Corridor

Owner: Kane County Division of Transportation

Consultants: Testing Services Corporation / TBE Group / S.T.A.T.E. Testing, LLC

The Stearns Road Corridor is not just a road and a bridge. It is a story of teamwork and collaboration that shift the paradigm of transportation engineering from simply paving over the landscape to leaving the environment in a BETTER place than when it began. Providing a much needed east-west crossing of the Fox River triggered the enhancement of the area's rich, natural resources that would otherwise continue to degrade. Over 216 acres of additional green space acquisition, restoration and protection ensure that Stearns Road will continue to be the precious resource it was meant to be in perpetuity.
